New Hire

Hire in a few working days with Robert Half Technology

A recent independent survey revealed that it can take up to 3 months to fill an open position. We designed our innovative Company-In recruitment process to help our clients reduce the loss of productivity associated with an open position, saving them both time and money. By leveraging Robert Half Technology's Company-In recruitment process, you will enjoy the following competitive advantages:

- We do the recruiting, evaluating and scheduling for you, presenting professionals who are matched to your specific hiring requirements and workplace environment.
- You conduct all first round interviews in one session at our office, and following these interviews you decide which candidate(s) you would like to meet again (or hire immediately if you prefer).
- As our research reveals, our unique approach and methodology can save you up to 3 months in lost productivity associated with recruiting on your own. We reduce the entire hiring process on average to a few business days, from taking the job brief to confirming the start date of the successful candidate.

For more information on the Company-In contact a Robert Half Technology Consultant in your local area.
